

Who is Trees for All?

The Trees for All Foundation was set up in 1999. We are the most experienced supplier of carbon offsets in the Netherlands and the only provider of carbon offsets that meets the stringent requirements of CBF certification. We're proud of that! Thanks to all our donors, we're able to plant dozens of acres of forest every year, both in the Netherlands and abroad. In addition, we restore forest and woodland and contribute to improving the standard of living of people in developing countries. We're a results-focused foundation with an energetic team of people working heart and soul for a green and healthy planet work.

Trees care for us, and that's why we care for trees. That's our motto.

Everyone who wants to contribute to a greener planet and a healthy climate can support our work.

Trees for All's mission focuses on people, the environment and added value. It is not just a donation, but active participation!

Why trees...

Why sustainability?

- Sustainability is the indefinite action of making human consumption and waste generation such that it does not exceed the Earth's ability to restore natural resources and process waste so that future generations have an equal, or ideally better, environment than previous generations. -

Global warming

Over the past 50 years, the average global temperature has increased at the fastest rate in recorded history.

Deforestation

In the Brazilian Amazon it is estimated that 60-80% of logging is illegal (Indonesia even 90%).

Disappearing arctic ice

Arctic sea ice has declined by an average of 27,000 square miles a year.

Less animals' habitats

Habitat loss poses the greatest threat to species. The world's forests, swamps, plains, lakes, and other habitats continue to disappear!

What is the business plan?

Who can participate
